9<sup>th</sup> September 2011,

Reference: Personal reference for Dean Maunder.

To whom it may Concern;

This letter is a personal recommendation for Dean Maunder. Company policy does not allow for a company reference but I am compelled to offer my own personal views about Dean's competencies within a team environment.

I have previously worked within large project groups and business environments and would have to rank Dean very highly against all the others I have worked with. The ability to work autonomously or within a large scale project team is a testament to his versatility and flexibility.

Dean always afforded assistance in any situation where his help was required. This reliance on his knowledge, technical skills and ability to source solutions is a luxury for his fellow workers.

Dean is a leader. His ability to drive a team to resolve complex scenarios and timely resolution of project timelines was the primary reason for the quality output from his immediate team. He was also very comfortable in a leadership role in meetings and discussions with high level management.

As a mentor, Dean has the respect of his staff, inspiring and motivating them. He was never reticent with his knowledge always preferring to share his wealth, fuelling greater confidence in those under his direction.

It should be very obvious that Dean will be greatly missed however I have no hesitation in recommending him to any organisation that wants a team player that will enhance any endeavour he is involved with.

Please do not hesitate to contact me if you wish to discuss this recommendation.

Yours Sincerely

Rodney Stuckey
